

LETTUCES grown in open field in France

Untreated lettuce

AMINOFIT.Xtra was applied once pre transplant, by soaking of the roots in a solution with 5 cc/l and twice by foliar spray at 21 days interval, at dose 2,5 l/ha

Lettuces from the treated plots are about 7% heavier than lettuces from the control plots

Lettuce treated with AMINOFIT.Xtra

LETTUCES in Italy

Lettuces treated with AMINOFIT.Xtra

Untreated lettuces

Plots treated with AMINOFIT had earlier plants with better colour, higher weight (+11%) and better health
